

630 SXCF 220 #1 Synthetic, Corrosion Resistant **Machinery Grease** 

## **APPLICATION AREAS**

 Uniquely Suited for Medium to Large Bore Bearings

- Designed for Wet, Hot, **Corrosive Services**
- Feeders, Mixers, Agitators

Conveyor Rollers

- Grease Lubricated Chains and Sprockets
  - Gears and Cams
    - Guides/Slides
  - Motor Drive Valves
    - Conveyor Drives

 Rotary Filling, Can Seemers, **Bottle Washers** 

## **PRODUCT DATA SHEET**

### **KEY FEATURES AND BENEFITS**

- Heat-stable 100% synthetic base stock
- Pumpable, non-clogging NLGI #1
- Calcium sulfonate complex technology improves resistance to water wash out and spray off
- NSF H1 Registration number 157133
- Contains no animal fats or oils
- For use in food and non-food industries

### PACKAGING

400 g, 18 kg, 55 kg, 180 kg

### DIRECTIONS

Apply with a grease gun or automatic dispensers. Before using, wipe grease fittings to remove contamination. Keep grease container closed when not in use. Reapply at regular intervals.

TYPICAL PHYSICAL PROPERTIES

# DESCRIPTION

Chesterton® 630 SXCF 220 #1 is a high base oil viscosity, high-performance synthetic grease that has excellent corrosion protection with superior resistance to water washout and spray off. It has a dropping point of 316°C (600°F), and excellent shear stability. It performs at temperatures well beyond that of most conventional petroleum greases. 630 SXCF 220 #1 will continue to lubricate even in the presence of heat, steam, hot water wash downs.

Uses of Chesterton 630 SXCF 220 #1 can be found throughout any industrial plants. It is especially advantageous where there are high temperatures and water environments such as in a pulp and paper mill, high moisture and water exposure such as in water/wastewater, marine, oil and gas applications, and extreme pressure such as in mining operations. 630 SXCF 220 #1 is NSF H1 registered and complies with FDA 178.3570 for use in food, beverage, and pharmaceutical processing equipment.
